## HARDY PLANTS

for NEW ENGLAND GARDENS

Perennials - Rock Plants Flowering Shrubs - Evergreens

# GRAY & COLE

WARD HILL . MASSACHUSETTS

### TO OUR CUSTOMERS

- LOCATION. Our nursery is in Haverhill, Mass., on the main road from Haverhill to Boston. It is within five minutes' walk of Ward Hill station on the B. & M. R. R., and also of the electric line from Haverhill to Ward Hill. Our post office address, and freight and express address, is Ward Hill, Mass.
- HOURS. We dig and deliver plants on week days only, from 7 A.M. to 6 P.M., but the nursery is open for inspection evenings and Sundays also.
- VISITORS. We welcome visitors to the nursery at any time. Throughout the season, from April to October, there are plants in bloom, and especially in Iris, Peony, and Phlox times there is a brilliant display. When Peonies bloom we have a special exhibition of cut blooms indoors so that comparison and selection of varieties can be made conveniently.
- SHIPPING SEASON. Although some plants can be moved successfully almost any time between spring and autumn, the normal planting and shipping season is from early April to early June, and September 1 to the middle of November. German Iris can be shipped in July and August.
- SHIPPING. All plants and bulbs are shipped by express or parcel post, the purchaser paying the charges. Many small orders can be sent more economically by parcel post, and if the purchaser wishes his order shipped by parcel post he should add 10 per cent or more to the price of the plants.

Local orders within a 6-mile radius will be delivered by truck without charge. For longer distances, up to 30 miles, truck delivery is advisable for trees and shrubs, for which a reasonable charge will be made.

- PRICES. The prices quoted on herbaceous plants include packing, but an extra charge is made for packing and boxing trees and shrubs. Five plants of the same variety will be sold at the 10 rate; 25 at the 100 rate.
- TERMS. Our terms are cash with order, or satisfactory reference from unknown customers. All accounts are due the first of each month.
- GUARANTEE. We guarantee that plants are true to name, and are delivered to customers in good live condition. Any complaints of plants received in poor condition must be made at once. We do not guarantee plants to live or grow, their future life being entirely the risk of the purchaser.

It is our earnest endeavor to supply only good healthy plants which, if handled, planted, and cared for under favorable conditions will live and bloom, but failure may occur from many causes over which the nurseryman has no control—unsuitable location, poor soil, unfavorable weather, lack of moisture, ignorant or careless culture. In case of any mistakes on our part, we shall, if promptly notified, be glad to correct them.

**FALL BULB LIST.** In September, we issue a supplement to this Catalogue, listing Tulips, Hyacinths, Crocuses, Scillas, and other bulbs for fall planting.

GRAY & COLE . . . Ward Hill, Mass.

### HARDY PERENNIALS

Except a few indispensable biennials like Campanula medium and Digitalis purpurea, our list is confined to the choicest and hardiest herbaceous perennials which are best to use as the basis for New England hardy borders and rock gardens. Many old-fashioned plants are included which have been cultivated in New England gardens since colonial times. A few are included which, though short-lived, are beautiful enough to warrant occasional replacing. We have in the nursery other varieties besides those listed here.

The plants that we furnish are field-grown, except a few varieties which are more successfully handled in pots. Extra large clumps can sometimes be supplied

at double price.

### All varieties not priced differently are 25 cts. each, \$2 for 10, \$16 per 100. Add 10 per cent for parcel post.

- ACONITUM napellus, Sparks (acutum). Sparks' Aconite. 3 ft. June, July. Very dark blue hood-shaped flowers in a loose raceme. Will grow in part shade. 30 cts. each, \$2.50 for 10.
- **AJUGA genevensis.** Geneva Bugle. 8 in. May. A spreading plant with spikes of bright blue flowers. Makes a good ground cover for shady places.
- ALTHAEA rosea. Hollyhock. 5 to 8 ft. July. Stately old-fashioned flower, very effective in clumps. Biennial in habit though some plants may bloom several years. Mixed colors in single and double forms. 20 cts. each.
- ALYSSUM saxatile compactum. Dwarf Goldentuft. 1 ft. May. Broad mass of bright yellow flowers with gray foliage. 20 cts. each.
  - —luteum. 1 ft. May. This is a new variety with pale yellow flowers. 30 cts. each, \$2.50 for 10.
  - **serpyllifolium.** 4 in. May. Very small variety with gray leaves and yellow flowers, for sunny rock garden.
- ANCHUSA myosotidiflora. Siberian Bugloss. 15 in. May. Beautiful forget-me-not-like flowers of rich blue. Will grow in light shade.
- in. June. A real alpine with rosettes of leaves and pink flowers in umbels. 30 cts. each, \$2.50 for 10.
- **ANEMONE pulsatilla.** European Pasqueflower. 1 ft. April. Purple flowers and interesting silvery, hairy foliage and seed-pods.

- AQUILEGIA alpina. Alpine Columbine. 1 ft. June. Dwarf form with blue flowers. 20 cts. each.
  - canadensis. American Columbine. 1½ ft. May, June. Our native variety with yellow and red flowers. Sun or light shade. 15 cts.
  - chrysantha. Golden Columbine. 2 ft. June, July. The golden yellow, long-spurred flowers remain in bloom a long time and are airy and graceful in the garden as well as for cut-flowers. Thrives either in full sun or half shade. 20 cts. each, \$1.50 for 10.
  - flabellata. Fan Columbine. 1 ft. June. Dwarf variety with lilac and white flowers and handsome glaucous foliage. 20 cts. each.
  - **Long-spurred Hybrids.** 2 ft. June. Delicate flowers in many colors. Not long-lived. 20 cts. each, \$1.50 for 10.
  - vulgaris nivea. Munstead White Columbine. 2 ft. June. Short-spurred white flowers. Profuse bloomer. Good foliage. 20 cts. each.
- ARABIS alpina. Alpine Rockcress. 6 to 12 in. May. Dense carpet of white flowers. Effective as background for early tulips.
  - —flore-pleno. Double Alpine Rockcress. A new variety of the preceding, with double flowers. 30 cts. each, \$2.50 for 10.
  - **rosea.** A form with flowers flushed pink. 30 cts. each, \$2.50 for 10.
  - aubrictioides. Like the preceding variety but flowers are deeper pink. 30 cts. each, \$2.50 for 10.
  - mollis. 6 in. May. Low growing in rosettes of shiny dark green foliage. White flowers.

- ARENARIA verna caespitosa. Moss Sandwort. 3 in. June. A prostrate creeping plant with moss-like foliage and tiny white starry flowers.
- ARTEMESIA frigida. Fringed Wormwood.

  1 ft. Soft silvery gray finely-cut foliage.
  Yellow flowers insignificant.
  - vulgaris lactiflora. White Mugwort. 3½ to 4½ ft. August, September. Loose panicles of hawthorn-scented, white flowers on erect stems. Effective with Salvia azurea.
- ASTER, HARDY. September, October. Improved forms of our native fall-blooming Asters, with larger flowers and purer colors. Very free-blooming and showy for land-scape use or cutting.
  - Barr's Pink. 4 ft. New variety considered the best deep pink.
  - Lady Lloyd. 3 ft. Rose-pink.
  - Lil Fardell. 4 ft. Bright purplish pink.
  - Queen Mary. 4 ft. New variety with large lavender-blue flowers.
- ASTILBE, HYBRID. 2 to 3 ft. June, July. Feathery spikes of bloom, attractive in the garden and good for cutting. Likes rich, heavy soil, and will grow in part shade.
  - Gloria. Deep pink. 35 cts. each, \$3 for 10. Gruno. Pale pink; more open spike than Salmon Queen. 35 cts. each, \$3 for 10.
  - Salmon Queen. Pale salmon-pink. 35 cts. each, \$3 for 10.
- AUBRIETIA deltoidea. 5 in. May. Silvery green foliage and sheets of flowers in purple, mauve, and rose. Plant with Alyssum and Arabis for edging the border, or in the rock garden.
- BOLTONIA latisquama. Pink Boltonia. 4 to 6 ft. September. Lavender-pink. Very lovely in mass. Not so tall or coarse as the white variety. 20 cts. each, \$1.50 for 10.
- CAMPANULA carpatica. Carpathian Bellflower. 6 to 12 in. June, July. Blue flowers an inch across. Charming plant for rock work or edging, giving us a few blooms all summer.
  - -alba. White variety of the preceding.
  - garganica. 4 in. June. Trailing growth with lovely lavender star-shaped flowers. 2½ in. pots. 30 cts. each, \$2.50 for 10.
  - medium. Canterbury Bells. 2 to 3 ft. June, July. Very handsome, large, bell-shaped flowers. Biennials which must be replaced each season. 20 cts. each, \$1.50 for 10.
  - -Single Light Blue.
  - —Single Pink.
  - —calycanthema. Cup-and-saucer Bellflower. 2 to 3 ft. Semi-double flowers, each resembling a cup and saucer. Biennial. Mixed colors. 20 cts. each, \$1.50 for 10.
  - persicifolia. Peachleaf Bellflower. 2 to 3 ft. June, July. Large, blue, saucer-shaped flowers on tall spikes. Effective with Phlox Miss Lingard.
  - rotundifolia. Harebell; Blue Bells of Scotland. 1½ ft. June to September. Native

- plant with graceful blue flowers over long period. Will grow in part shade. 20 cts. ea.
- CERASTIUM tomentosum. Snow-in-Summer. 6 in. June. Carpet of white flowers and silvery foliage. Beautiful when grown in combination with Linum perenne. 20 cts.
- CHRYSANTHEMUM, HARDY. 2 to 4 ft. October, November. The flowers come after other blossoms have gone and in some seasons are spoiled by early hard frosts. Planting near a building, wall, or hedge will protect them or they may be covered when severe frosts are expected.
  - Barbara Cumming. New early yellow. 20 cts. each, \$1.50 for 10.
  - Early Bronze. Bronze-yellow. Our own introduction. Valuable variety because of its large flowers and early bloom, beginning about September 20. Much used by florists.
  - Lillian Doty. Light pink. 20 cts. each.
  - Little Dot. Small mahogany button. Late but extra hardy. 20 cts. each, \$1.50 for 10.
  - R. Marion Hatton. Light yellow. 20 cts. ea. Red Doty. Wine-red. 20 cts. ea., \$1.50 for 10. Ruth Hatton. White. 20 cts. ea., \$1.50 for 10.
- CIMICIFUGA racemosa. Cohosh Bugbane. 5 ft. July: Long, feathery spikes of white flowers high above the dark foliage. Suitable for a damp, shady spot or for planting with shrubs.
- convallaria majalis. Lily-of-the-valley. 8 in. May. An old-fashioned favorite, lovely for cutting. Will grow in part shade. 35 cts. each, \$3 for 10.
- to 3 ft. Golden yellow flowers all summer on long stems that are fine for cutting. Not long-lived, but self-sows. 20 cts. each.
- DELPHINIUM. Larkspur. July. One of the most beautiful hardy plants, and indispensable for its shades of blue. Sometimes gives a second crop of bloom in late summer. Lovely for cutting. Combines with Phlox Miss Lingard, Lilium candidum, Thermopsis, Hemerocallis flava, or white Japanese Iris.
  - Belladonna. 3 ft. Light sky-blue. Not quite so tall as the hybrids but very free blooming. Our stock is the improved variety.
  - Gold Medal Hybrids. 3 to 5 ft. All shades of blue, some with pink sheen.
  - Dwarf variety with fine foliage and deep blue flowers. Charming with Aquilegia chrysantha. 20 cts. each, \$1.50 for 10.
  - -Azure Fairy. A variety of the preceding with light blue flowers. 20 cts. each.
  - Wrexham hybrids. Seedlings from this famous English strain. 35 cts. each, \$3 for 10.
- DIANTHUS barbatus. Sweet William. 1½ ft. July. Plants will sometimes live several seasons, but best treated as a biennial.
  - -Black Maroon. Very dark. 20 cts. each
  - -Pink Beauty. Salmon-pink. 20 cts. each.

#### DIANTHUS, continued

- caesius. Cheddar Pink. 8 in. May. Glaucous foliage and pink, spice-scented blossoms. 20 cts. each, \$1.50 for 10.
- caesius hybrid. 6 in. May. Dwarf variety with compact tuft of foliage, covered in spring with a mass of pink flowers. A gem for the rock garden. 30 cts. each, \$2.50 for 10.
- **deltoides.** *Maiden Pink.* 6 in. June, July. Dwarf variety of creeping habit with deep pink flowers. 20 cts. each, \$1.50 for 10.
- DICENTRA formosa. Western Bleedingheart.

  1 to 1½ ft. Small pink flowers and finely cut foliage. Blooms in May and a little through the summer. Flowers not so large or showy as Spectabilis, but foliage better and plant more permanent.
  - old-fashioned favorite. Long, drooping racemes of heart-shaped pink flowers. Will grow in part shade. Good for cutting, and usually in bloom Memorial Day. 40 cts. each, \$3.50 for 10.
- **DICTAMNUS.** Gasplant. 2 to 3 ft. June. A very long-lived plant with handsome dark green foliage. Fragrance similar to Lemon Verbena.
  - albus. White. 2 yr., 35 cts. each.
  - albus ruber. Lavender-pink. 2 yr., 35 cts. ea.
- DIGITALIS purpurea, Giant Shirley. Foxglove. 3 to 5 ft. June, July. Stately racemes of inflated flowers whose vertical lines suggest spires or towers of bells. Biennials which easily self-sow. New strain, of mixed colors from white to deep rose. 20 cts. each, 1.50 for 10.
  - Sutton's Giant Primrose. A beautiful strain with flowers of rich cream or buff. 20 cts. each, \$1.50 for 10.
- poronicum caucasicum. Caucasian Leopardbane. 1 to 1½ ft. May. Showy yellow, daisy-like flowers. 35 cts. each, \$3 for 10.
- EPIMEDIUM macranthum niveum. 9 in. April, May. Dainty, charming plant for half shade. Fine foliage and waxy white flowers. 35 cts. each, \$3 for 10.
  - **pinnatum clegans.** A variety of similar habit with yellow flowers. 35 cts. each, \$3 for 10.
- ERYNGIUM planum. 2 ft. July, August. Steel-blue flowers, thistle-like in form. The flowers can be cut when colored and dried for winter bouquets.
- FILIPENDULA hexapetala flore-pleno. Double Dropwort. 1½ ft. June, July. Small, white, globular flowers and fernlike foliage. Graceful. 30 cts. each, \$2.50 for 10.
- GAILLARDIA aristata. Blanket Flower. 2 ft. Showy flowers with reddish brown centers and yellow daisy-like petals with rings of red. Blooms all summer. Short-lived but easily self-sows. Useful for cutting. 20 cts.

- GALEGA officinalis alba. Albino Goatsrue. 2 ft. June. A good white perennial with pea-shaped flowers and attractive foliage.
- GYPSOPHILA paniculata. Babysbreath. 2 to 3 ft. July. Minute white flowers in a gauze-like, misty mass. Valuable in the garden for contrast with coarser flowers, and indispensable for cutting. These are seedlings of the double form and some of them come double.
  - —flore-pleno, Bristol Fairy. New double variety with larger flowers. Blooms over longer period than the older double form. Grafted plants, 40 cts. each, \$3.50 for 10.
  - repens. Creeping Gypsophila. July. A mat of gray foliage and white flowers, for the rock garden.
- HELENIUM autumnale rubrum. Red Sneezeweed. 3 to 4 ft. September. Terracotta-red flowers—an unusual color. Beautiful for cutting.
- HEMEROCALLIS. Daylily. Yellow or orange, very fragrant, lily-like flowers and tall grass-like foliage. Will thrive in part shade. Very hardy and soon forms large clumps. By choosing several varieties the blooming period can be prolonged.
  - Apricot. 2½ ft. June. Apricot-yellow.
  - Aureole. 2½ ft. June. Deep yellow.
  - flava. Lemon Daylily. 3 ft. June. Clear yellow. The best-known, early variety.
  - Golconda. 4 ft. July. Yellow. 50 cts. each.
  - **J. A. Crawford.** 3 ft. July. Rich apricotyellow. New Betscher variety, not unlike Ophir. 75 cts. each.
  - middendorffi. Amur Daylily. 2 ft. June. Orange-yellow.
  - Mrs. W. H. Wyman. 3 ft. August. Clear yellow flowers. New Betscher variety that blooms late. 75 cts. each.
  - Ophir. 3 ft. July. Golden yellow. 50 cts. each.
  - thunbergi. Japanese Daylily. 3 to 4 ft. July. Pale yellow, like Flava, but a month later.
  - (late) 4½ ft. August. This variety which came to us without a name is pale yellow, the latest and tallest we have. 50 cts. each.
- HESPERIS matronalis alba. White Dames Rocket. 2 ft. June, July. Graceful spikes of white flowers, effective with other plants.
- HEUCHERA brizoides. Pinkbells. 2 ft. June to August. Taller than sanguinea, and pale pink in effect.
  - sanguinea. Coralbells. 1½ ft. June to August. Low tufts of leaves from which spring slender stalks with small, bell-shaped, coral-red flowers. Graceful and delicate as cut-flowers.
- IBERIS sempervirens, Little Gcm. Evergreen Candytuft. 6 in. May. Flat heads of white flowers with evergreen foliage. 30 cts. each, \$2.50 for 10.

### IRIS

RIS, or Fleur-de-lis, include many different species, some of which are among our most beautiful hardy plants. Beginning with the dwarf Pumila varieties, which bloom in early May, followed by Cristata, the Intermediate varieties, German Iris, Siberian Iris, and finally the splendid Japanese, there is continuous bloom until July. The German Iris, which supplies a large part of our garden color in May and June, is the best known section. It has a wide range of colors, all shades of white, yellow, maroon, blue, lavender, pink, and purple. It grows easily and is very effective in mass. Hundreds of new varieties have been originated, from which the following seventy have been selected as the best.

Iris can be planted almost any time except when in bloom, but the best time

is in July and August.

In the descriptions "S" refers to the standards or upright petals, and "F" the falls or drooping petals.

All varieties not priced differently are 25 cts. each, \$2 for 10, \$16 per 100. Varieties priced at 20 cts. each are \$1.50 for 10; those at 30 ets. each are \$2.50 for 10; those at 35 cts. each are \$3 for 10; those at 40 ets. each are \$3.50 for 10.

### GERMAN IRIS

Ambassadeur. Red-violet; orange beard. A magnificent bronze and black-maroon bicolor that rates very high among Irises, but is now low in price.

Ann Page. Lovely pale lavender. Large flowers of splendid form. Sweet scented. 30 cts. each.

Anna Farr. White with pale blue markings. A beautiful plicata resembling Ma Mie but superior in form and substance. 30 cts. each.

Aphrodite. Violet-pink. An aristocrat among irises, perfect in form, smooth in texture. 30 cts. each.

Asia. S, pale silvery lavender, deepening to yellow; F, pale red-purple; bright yellow beard. A massive flower of unusual color and splendid form. Considered one of the finest Iris. 35 cts. each.

Ballerine. Lavender-blue. Very large. Similar to Lord of June.

Bruno. S, fawn, tinted violet; F, rich velvety red-purple. Known as one of the finest irises. A flower of heavy substance lasting long in bloom. 35 cts. each.

Buto. Very large, stunning dark blue purple, early-blooming. 40 cts. each.

Candlelight. A blend of mauve illumined with yellow. One of the highest rated new varieties. 40 cts. each.

Chasseur. New yellow variety of fine form, brown veining on falls. Late. 30 cts. each.

Coronation. Deep yellow. One of the best of

the new yellows. 40 cts. each. Dalila. S. flesh; F. plum-red. Distinctive variety. 20 cts. each.

Dolly Madison. Pink-mauve to deep yellow. A highly rated new blended type. 50 cts. each. Doxa. Creamy olive flushed lavender. Novel

color. Large flower. 50 cts. each.

**Dream.** Light rose-pink. Similar to Rheingauperle and Susan Bliss. 20 cts. each.

Duke of Bedford. Deep blue-purple flushed red.

Elizabeth Egelberg. Very large, tall mauve-pink with domed standards and broad flaring falls. 50 cts. each.

Euphony. A new blend of yellow, brown, and blue. 40 cts. each.

Flammenschwert. S, yellow; F, rich maroon bordered yellow. Brilliant. 20 cts. each.

Folkwang. S, white flushed pink; F, claretred. Showy. 30 cts. each.

### GERMAN IRIS, continued

- Frieda Mohr. A lilac-pink bicolor. S, pale lilac-pink; F, deep lilac-pink. A tall grower with very large flowers. One of the finest new varieties. 50 cts. each.
- Garnet. A velvety black-purple flower, not large in size, but rich in color and conspicuous in the garden for its form and poise. 40 cts.
- Geo. J. Tribolet. S, violet; F, blackish redpurple. 30 cts. each.
- Germaine Perthuis. Velvety violet-purple. Resembles Mme. Gaudichau, but redder in tone. Rare and beautiful. 35 cts. each.
- **Gleam.** Pale lavender similar in color to Mary Barnett. 40 cts. each.
- **Gold Imperial.** Chrome-yellow, brilliant orange beard. One of the good yellow varieties, deeper than Shekinah.
- Grace Sturtevant. Exceedingly rich dark red-brown with brilliant orange beard. Velvety and handsome. \$1 each.
- Imperator. Red-purple. Large and fine. Makes striking garden effect.
- **Inner Glow.** Ivory-white of fine form, with yellow center. 30 cts. each.
- **King Tut.** Large flowers of a striking red brown. 50 cts. each.
- **Kochi.** Rich deep purple. Early. Sometimes in bloom Memorial Day. 20 cts. each.
- Lent A. Williamson. S, lavender-violet; F, deep purple; yellow beard. Tall and large.
- **Lona.** Soft buff, dotted purple, yellow beard. One of the finest new Plicatas.
- **Lord of June.** Lavender-blue. Very large, fragrant flower.
- Ma Mie. White, with delicate blue penciling. 20 cts. each.
- Mary Barnett. Pale lavender; intense orange beard. 30 cts. each.
- **Medrano.** S, reddish copper; F, dark crimson-purple. Distinct. 20 cts. each.
- Michelline Charraire. Pure white with flush of yellow in throat. 40 cts. each.
- Midgard. An exquisite combination of pink and yellow, general effect being rose pink. This new iris is already in great demand. 35 cts.
- Mildred Presby. S, flushed white; F, rich violet. Fine variety much admired.
- **Mme.** Cheri. Violet tinted with pink and warmed by a yellow undertone. Tall, vigorous, with large flowers.
- **Morning Splendor.** S, violet; F, velvety purple. One of the finest American varieties. 30 cts. each.
- Mother of Pearl. Pale lavender, creamy undertone. Similar to Queen Caterina. Large flower of fine form. 20 cts. each.
- Mrs. Marion Cran. Brilliant light rose. Medium sized flowers of perfect form on tall stems. One of the finest pink iris. 30 cts. each.
- Nebraska. The deepest most brilliant yellow, with some veining on the falls. 40 cts. each.

- Ochracea (Sunset). Artistic combination of dull lavender and yellow. Very late. 20 cts. each.
- **Old Ivory.** Soft cream-yellow. Makes beautiful garden clump.
- Omaha. Almost a pure red. Makes a fine garden mass. 60 cts. each.
- Perfection. S. light blue: F. dark, velvety purple; orange beard. 20 cts. each.
- Pink Lustre. (Gray & Cole.) Pink lighted with yellow at center. Suggests color of old pink lustre chinaware. Whole effect pure old rose, with satiny sheen. Not a large flower, but exquisite color. 35 cts. each.
- Pioneer. Red-purple, orange beard. Fine new variety, tall and rich.
- Pluic D'Or. Another fine new yellow, tall and brilliant. 75 cts. each.
- Princess Beatrice. Lavender-blue. Best Dalmatica type. 30 cts. each.
- Queen Caterina. Pale, irridescent lavenderviolet. One of the finest pale varieties. Similar to Mother of Pearl.
- Rameses. S, light russet; F, pink. One of the very finest new varieties. \$2 each.
- **Redwing.** Another new red variety with a brown tone. 50 cts. each.
- Rhein Nixe. S, white: F, deep violet-blue, white edge. Large and fine. 20 cts. each.
- Rheingauperle. Light rose-pink of fine form. Similar in color to Dream and Susan Bliss, but distinct in form. 30 cts. each.
- Santa Barbara. Clear lavender-blue. Large blooms with horizontal falls. 40 cts. each.
- Scminole. S, violet-rose; F, velvety crimson; orange beard. Similar to Opera. 20 cts. each.
- Sensation. Another very large new blue variety. 75 cts. each.
- Shekinah. Pale yellow; orange beard. A little deeper than Flavescens, and taller. 20 cts. ea.
- Sir Michael. One of the world's finest iris. S, lavender-blue; F, rich velvety purple with red tone. \$1 each.
- Souvenir de Loctitia Michaud. A light blue iris of splendid form. 40 cts. each.
- Souvenir de Mme. Gaudichau. Deep rich blue-purple. Tall, strong grower; one of the finest dark purple irises. 30 cts. each.
- Susan Bliss. Light pink, orange beard. Similar to Dream and Rheingauperle, but later.
- Sweet Lavender. Pink and blue-lavender, rosy mauve effect. Charming, free blooming.
- **Taj Mahal.** A very fine pure white of good form and heavy texture.
- Tenebrae. Deep black-purple. 30 cts. each.
- Waconda. A new color, fuschia red in effect, very clear and bright. \$1 each.
- Wedgewood. Rich true blue with white beard. Large beautiful flower. 30 cts. each.

### **DWARF IRIS**

These varieties of dwarf Iris grow from 4 to 12 inches high and most of them blossom in early May before the German Iris. They are suitable for the rock garden and for edging borders.

Atroviolacea. 5 in. Red-purple. Very early. 20 cts. each.

Azurea (eaerulea). 4 in. Sky-blue. Earliest to bloom. True variety scarce. 20 cts. each.

Cristata. Crested Iris. 4 in. Rich amethyst-blue. Dainty, native, creeping species. A gem for the rock garden. Increases rapidly.

Cristata alba. This lovely white form of the Crested Iris is quite rare. 75 cts. each.

Cyanea. 6 in. Blue-purple. Effective planted with Phlox divaricata. 20 cts. each.

Glee. 1 ft. Pale yellow. New. Long period of bloom. 20 cts. each.

**Gracilipes.** Slender Iris. 8 in. June. Loveliest of the dwarfs. Slender foliage. Pale lavender flowers. Likes woodsy soil, not too dry, and a little shade. \$1.00 each.

Graminea. 8 in. Rich red-purple.

Orange Queen. 8 in. Yellow. 20 cts. each.

Schneekuppe, 1 ft. White. 20 cts. each.

Verna. Vernal Iris. 6 in. Another dwarf native species similar to Cristata. Likes part shade and acid soil. 20 cts. each.

### JAPANESE IRIS

Iris Kaempferi or Japanese Iris, bear large, gorgeous flowers in white, blue, lavender, purple, and crimson, with some yellow markings, some having three and some six petals. They grow 3 to 4 feet tall and bloom in July. They need a rich, moist soil, but the crowns must not be too wet in winter. They should be planted in spring or soon after flowering in July. Crimson-Pink. Three petals. 30 cts. each. Dark Blue-Purple. Six petals. 35 cts. each. Dark Red-Purple. Three petals. 30 cts. each.

Dark Red-Purple. Six petals. 35 cts. each. Light Blue Veined Purple. Three petals. 35 cts. each.

White. Three petals. 30 cts. each. White. Six petals. 35 cts. each.

### SIBERIAN IRIS

Iris orientalis and I. sibirica are closely related species, many garden forms being hybrids. They bloom in June between the German and the Japanese Iris, are very free-flowering, and good for cutting.

**Alba.** White with faint markings of brown and purple. Small flowers. Charming in a natural planting near water.

**Butterfly.** Porcelain-blue, slightly lighter than Perry's Blue. Lovely.

**Dragonfly.** Deep blue. New variety. Tall and fine. 35 cts. each.

Emperor. Rich deep violet. Very fine.

Kingfisher Blue. New variety announced as an improvement on Perry's Blue. 35 cts. each.

Perry's Blue. Porcelain-blue. Handsome.

Skylark. Blue. Similar to Perry's.

Snow Queen. White with yellow haft.

ty. 1 ft. A dwarf, compact form of the old-fashioned sweet-scented plant. Not entirely hardy here but can be grown with a little protection. Lovely color and delightful fragance for the rock garden. 35 cts. each, \$3 for 10.

LIATRIS pycnostachya. Cattail Gayfeather. 4 to 5 ft. August. Very showy tall spikes of red-purple flowers. This plant attracts much attention in our nursery. It is hardy and long-lived. Attracts butterflies. Harmonizes with Phlox Widar and Buddleia.

LILIUM. Lily. Many Lilies can be grown in the hardy garden if a little extra care is taken in planting and culture. Soil conditions must be right. There must be perfect underdrainage to insure that no excess moisture stands around the bulb in winter to rot it. But the soil must be heavy enough or contain enough humus to keep the roots cool and moist in summer. A liberal amount of peat moss, leaf mold, or very old manure can be forked in. If the soil is light or dry a mulch of these materials on top will help to retain moisture and feed the plant as the goodness leaches down. Make the mulch thicker for winter. Lilies will stand some shade, though not complete shade. Most of these varieties can be planted in fall or early spring. Except Candidum, they should be set from 6 to 10 inches deep.

canadense. Canada Lily. 3 to 6 ft. July. This lily with very graceful nodding flowers varying in color from yellow to red is one of our finest native plants. Under cultivation it will grow 6 ft. high and bear 20 blooms on a stem. Good among shrubbery, or in a half shady spot in the wild garden, where soil is not too dry. Small bulbs, \$1.20 for 10. Large bulbs, 25 cts. each, \$2 for 10.

candidum. Madonna Lily. 3 to 4 ft. July. Fragrant white flowers, often planted with Delphinium. This Lily likes good heavy loam properly drained, and a sunny location. It also likes lime and if a liberal amount is dug into the soil, and if the plants are frequently dusted with sulphur it will help to prevent the fungus that often attacks them. Cover the bulbs only 3 inches. For those who cannot plant in early fall, we supply potted bulbs for spring. We offer bulbs grown in our nursery, ready in Aug., 30 cts. each, \$2.50 for 10. Imported bulbs, ready in Sept., 25 cts. each, \$2.25 for 10, \$20 per 100.

elegans alutaceum. 1 ft. June, July. A dwarf variety with large apricot flowers spotted with purple-black. Can be used in the rock garden.

hansoni. Hanson Lily. 3 ft. July. Thick, waxy petals, orange-yellow, slightly dotted brown. A very healthy, hardy, and permanent Lily that will grow in sun or part shade. Plant in fall. 50 cts. each, \$4 for 10.

#### LILIUM, continued

- henryi. Henry Lily. 3 to 4 ft. August. Orange-yellow blossoms in form like the Speciosum. A hardy variety that grows easily and is desirable for its late-blooming habit. 40 cts. each, \$3.50 for 10.
- regale. Regal Lily. 3 to 5 ft. July. White with yellow at center, flushed pink on outside. Very fragrant and beautiful. This new Lily from China is now being grown widely and can be had at a reasonable price. It can be grown from seed to blossom in about three years. Medium bulbs, 25 cts. each, \$2 for 10. Large bulbs, 35 cts. each, \$3 for 10.

Seed, small packet, 25 cts.; large packet, 50 cts.

- speciosum magnificum. 3 ft. August, September. Rosy white, spotted with crimson, petals curving back. Medium bulbs, 25 cts. each, \$2 for 10. Large bulbs, 35 cts. each, \$3 for 10. Extra large bulbs, 45 cts. each.
- 5 ft. August. A hardy native Lily. 3 to 5 ft. August. A hardy native Lily. Orange with dark spots. Strong bulbs, 20 cts. each, \$1.50 for 10. Large bulbs, 35 cts. each, \$3 for 10.
- tigrinum splendens. Giant Tiger Lily. 3 to 4 ft. July, August. The old-fashioned, very hardy orange-red Lily with dark spots. Easy to grow. 20 cts. each, \$1.50 for 10.
- umbellatum. 2 ft. July. Orange-red, upright, vase-shaped flowers. Very showy and easy to grow. 20 cts. each, \$1.50 for 10.
- LIMONIUM (STATICE) latifolium elegantissima. Bigleaf Sea-lavender. 1½ to 2 ft. July, August. Minute purple-blue flowers in mist-like effect similar to Gypsophila. Can be dried for winter bouquets. Does best in deep, rich soil that is not too dry. This variety is an improved form with larger flowers. 30 cts. each, \$2.50 for 10.
- LINUM perenne. Perennial Flax. 1 to 1½ ft. June, July. Pale blue flowers and light graceful foliage. Not long lived but often self sows. Worth replacing every year or two because of its lovely color and long season of bloom. 20 cts. each, \$1.50 for 10.
- LOTUS corniculatus. Birdsfoot Trefoil. June to September. A trailing plant with small,

- yellow, pea-like flowers slightly marked with red. One of the few rock plants that bloom in midsummer. For sunny ledges.
- LUPINUS, New Hybrids. 3 ft. June. Mixed colors in shades of blue, pink, and mauve. Effective spikes of pea-shaped blossoms.
- LYCHNIS alpina. Arctic Campion. 4 in. May. A rock plant with tufted foliage and purplepink, star-like flowers. 20 cts. each.
- MERTENSIA virginica. Virginia Bluebells. 1 to 1½ ft. May, June. This charming perennial, with its lovely pink and blue bells, is one of the most admired plants in our nursery when it blooms in May. Plant it in groups in the wild garden or half-shady border with the late daffodils. Fall planting of dormant roots is best. Plants in spring, 25 cts. each, \$2 for 10. Dormant roots in fall, \$1.20 for 10, \$9 per 100.
- MONARDA fistulosa. Wildbergamot. 4 ft. July, August. Native plant with lavender flowers loosely arranged on tall stems. Effective at the back of the border.
- NEPETA mussini. 1 to 1½ ft. June. Lavender flowers; gray foliage; low trailing habit. Fine for the edge of the border, and effective with late pink Tulips. We have two forms, one with small leaves, and one with larger leaves that blooms a little earlier.
- PAPAVER alpinum. Alpine Poppy. 6 in. June, July. Lovely dwarf poppies varying in color from white to orange. They need a sunny, well-drained slope in the rock garden. Though short-lived they often self-sow.
  - orientale. Oriental Poppy. 2 to 3 ft. June. Orange-scarlet with black center. The most brilliant perennial. Dormant roots in Aug. and Sept., 25 cts. each, \$2 for 10. Plants in 4 in. pots for spring, 30 cts. each, \$2.50 for 10.
  - -Edna Perry. A salmon-pink variety of noticeably strong growth. Dormant roots in Aug. and Sept., 30 cts. each, \$2.50 for 10. Plants in 4 in. pots for spring, 35 cts. each, \$3 for 10.
  - —Mrs. Perry. Lovely salmon-pink flowers. Dormant roots in Aug. and Sept., 30 cts. each, \$2.50 for 10. Plants in 4 in. pots for spring, 35 cts. each, \$3 for 10.

### SPECIAL OFFER OF IRIS AND PEONIES Collection of Twelve Choice Iris

Our selection of twelve named varieties, labeled; including many colors. (Value \$2.50)—for \$1.50. Parcel post 15 cts. extra.

#### Collection of Six Choice Peonies

Our selection of six different named varieties, labeled; including white, light pink, deep pink, and red shades; early and late blooming.

(Value \$5)—for \$3. Parcel post 30 cts. extra.

### PEONIES

UR list includes sixty varieties which, from our experience, promise to give good results in New England gardens. Varieties differ in habits of growth and bloom, and we have selected these, not only for beauty of flower, but also for freedom of bloom, and vigorous healthy growth. Peonies are best planted in September and October, but they can also be moved in early April. They should be set in a sunny place, in good soil where peonies have not been grown before, at least 3 feet apart. They do best in a medium heavy soil with some clay in it. If the soil is prepared rich and deep they may be left undisturbed ten or fifteen years, otherwise they may deteriorate after four or five seasons and have to be divided and started again. Be sure to apply fertilizer two or three times every season, before and after blooming, in the form of bone meal or a good commercial fertilizer; well-rotted manure may be used sparingly.

The prices quoted are for one-year roots, which is the size we advise planting. Some of these will bloom the first season but the flowers are not likely to be

typical until the second or third year.

In the descriptions "E", "M", and "L" refer to early, midseason, and late.

Albert Crousse. Pale salmon-pink. Large, very full bloom. L. 85 cts. each.

Augustin d'Hour. Crimson-red. M. 75 cts. each.

valanelie. Cream-white. Fragrant. Free bloomer and fine cut-flower. L. 75 cts. each. Avalanelie.

Baroness Schroeder. Flesh-white turning to cream-white. Fragrant and beautiful. One of the finest late whites. L. 85 cts. each.

Charles McKellip. Rich bright red. M. cts. each.

Cherry Hill. Deep garnet. Tall. Good land-scape variety. E. \$1.50 each. Chestine Gowdy. Silvery pink with cream-

colored collar. Cone-shaped. LM. 85 cts.

Duchesse de Nemours. Sulphur-white, cupshaped. Free bloomer. An old, reliable, and

lovely variety. E. 60 cts. each.

Edulis Superba. Brilliant rose-pink. Free bloomer. Fragrant. Very early. 60 cts. each.

Eugene Bigot. Brilliant deep red. Best of the later reds. LM. 85 cts. each.
Faribault. Deep pink with silvery sheen. Com-

pact growing plant with blooms held erect. L. 85 cts. each.

Festiva Maxima. Pure white, tipped with crimson. Very large. One of the finest whites. E. 60 cts. each.

Floral Treasure. Delicate salmon-pink. Charming flower. M. 60 cts. each.

Frances Willard. Ivory-white. One of the best whites. LM. \$1 each.

Georgiana Shaylor. Pale rose-pink. Large flat flower. LM. \$1.25 each.

Gigantea (Lamartine). Very large flowers of light silvery pink, somewhat flat in form. Spicy fragrance. M. \$1 each.

Gloire de Charles Gombault. Pink and salmon-flesh. Showy. M. 85 cts. each.

Grandiflora. Flesh-pink. Very large. A reliable bloomer that comes very late. \$1 each.

Jubilee. White. Very large flat flower. Very beautiful, but stems weak. M. \$1 each.

Karl Rosenfield. Deep rich crimson with very little purple. Best all-round dark red Peony. 75 cts. each.

La France. Soft pink. Large. Tall and upright. Slow grower. LM. \$2 each.

La Perle. Pale lavender-pink. Delicate and charming variety. M. \$1 each.

Le Cygne. Milk-white, with incurved petals. Distinct and beautiful. Delicate fragrance. Considered the finest Peony. M. \$2.50 each.

#### PEONIES, continued

Livingstone. Soft rose-pink. Very large and full. Reliable late variety. L. 75 cts. each.

Longfellow. Brilliant crimson. Similar to Karl Rosenfield. M. \$1.25 each.

Lora Dexheimer. Brilliant crimson. Similar to Longfellow, but earlier. EM. \$1 each.

Marie Jacquin (Water Lily). Flesh-white; cup-shaped; yellow stamens; rich fragrance. M. \$1 each.

Marie Lemoine. Cream-white. Very late. Dwarf-growing plant. \$1 each.

Mary Brand. Brilliant deep red. M. \$1.25 ea. Milton Hill. Pale salmon and flesh color. Exquisite flower. L. \$2 each.

Mme. Auguste Dessert. Rose-pink. Free bloomer. Upright. M. \$1 each.

Mme. Bucquet. Dark crimson. M. 85 cts.

Mme. Calot. Flesh-white, fading to white. Very large. Sure bloomer. E. 60 cts. each.

Mme. de Vatry. Pink and cream. M. 75 cts. each.

Mme. Ducel. Silvery pink, incurved petals. Free bloomer. E. 75 cts. each.

Mme. Emile Galle. Pale pink. Delicate and beautiful. Good late variety. 75 cts. each.

Mme. Geissler. Brilliant deep pink. Very large and showy blooms that attract much attention. M. \$1 each.

Modeste Guerin. Carmine-pink. M. 85 cts. each.

Mons. Krelage. Deep wine-red. M. 85 cts. each.

Mons. Martin Cahuzac. Black-maroon. The darkest Peony. EM. \$2 each.

Octavie Demay. Blush-pink fading to white. Lovely flower. Plant dwarf. E. 85 cts. each.

Philomele. Pink, with deep yellow center. Striking flower. M. 75 cts. each.

**Primevere.** Cream and sulphur-yellow. Best of the yellow Peonies. Beautiful if blooms are cut before they fade. M. \$1.25 each.

Richard Carvel. Brilliant red. Similar to Felix Crousse, but earlier. E. \$1.50 each.

Rosa Bonheur. Large soft pink flowers on a rather dwarf plant. LM. \$2 each.

Sarah Bernhardt. Soft pink. Large. Strong grower. Regular bloomer. LM. \$1 each.

Souvenir de Louis Bigot. Vivid rose-pink with salmon tinge. Similar to Walter Faxon but more brilliant. One of the finest new varieties. M. \$2 each.

Suzette. Loose flower of bright pink. Very free bloomer, stiff stems. \$1.25 each.

Therese. Soft shell-pink. Very large, loose flower. The finest pale pink Peony now reasonable in price. M. \$1.50 each.

Umbellata Rosea. Pink with cream center. Stiff, upright stems. Very early. 75 cts. each.

Venus. Delicate shell-pink. Lovely when halfopen. Good for cutting. M. 85 cts. each.

Walter Faxon. Bright rose-pink with salmon shading. Distinct and lovely color. M. \$1.75 each.

### SINGLE AND JAPANESE PEONIES

Ama-no-Sode. Jap. Bright rose-pink with heavy center of yellow staminodes. One of the finest varieties. M. \$3 each.

Clairette. Very large white of silky texture. Blooms in clusters, profusely. Tall strong stems, somewhat spreading. \$1 each.

Dog Rose. Jap. Rose-pink; center of yellow petaloids. Good late variety. \$1.25 each.

Flashlight. Jap. Crimson petals with dull golden center. Distinct. M. \$1 each.

Isani Gidui. Jap. White, with heavy cushion of yellow staminodes. The finest white Japanese variety. M. \$5 each.

Le Jour. White, with two rows of very wide overlapping petals. Perhaps the finest of the single white varieties. \$1.50 each.

L'Etincelante. Brilliant carmine with silvery margin. Very fine. M. \$1 each.

Madeleine Gauthier. Flesh-pink which fades to white. M. \$1 each.

Mikado. Jap. Bright crimson; petaloids crimson, edged and tipped gold. Effective land-scape variety. L. \$1.25 each.

Princess Mathilde. Deep pink. M. \$1 ea.

The Moor. Dark garnet with golden stamens. Rich color. Good landscape variety. M. \$1

### MAY-FLOWERING PEONIES

Officinalis rosea plena. Double. Deep rosepink. \$1.25 each.

—rubra plena. Rich deep crimson. The "Piney" of old-time gardens. This and the preceding one are sometimes in bloom on Memorial Day. \$1 each.

PHLOX amoena. 6 in. May, June. Deep, rich rose-pink. Makes a sheet of color. A little taller and not so spreading as P. subulata.

divaricata. 10 in. May. Lovely blue-lavender flowers, very effective planted in mass. Will grow in light shade.

subulata. Moss Phlox. 4 in. May, June. Low moss-like foliage which forms a carpet and is hidden under masses of bloom. Varieties as follows:

—alba. White. 20 cts. each.

-, Alice Wilson. Lavender with noticeable pink tone.

—, Apple Blossom. Very pale pink. 20 cts.

— atrolilacina. Mauve. This variety and Lilacina are delightful with Phlox divaricata and late yellow Tulips.

—, Fairy. New variety of compact habit with very pale lilac flowers.

-lilacina. Lilac. 20 cts. each.

-, Nelsoni. White, of very compact habit.

-rosea. Bright rose-pink. 20 cts. each.

-, Vivid. Bright pink tinged salmon. New variety of clearer color than Rosea. Grows in compact clumps. Fine rock plant.

### PHLOX

HIS late summer and fall-blooming perennial is indispensable for mass effects of brilliant color in the garden. No other perennial extends its bloom over a longer period, especially if the old flowers are clipped off so that the plants will continue blooming. Certain varieties can be combined very effectively, and attractive combinations of Phlox with other perennials can be arranged as suggested in the descriptions below. Care should be taken that Phlox is not allowed to form seed, as the self-sown seedlings often come up in the center of the clumps, eventually choking out the original plants, and the seedlings are often of poor color.

All varieties not priced differently are 25 cts. each, \$2 for 10, \$16 per 100. Varieties priced at 30 cts. each are \$2.50 for 10; those at 35 cts. each are \$3.00 for 10; those at 40 cts. each are \$3.50 for 10; those at 50 cts. each are \$4 for 10.

- B. Comte. Deep red-purple, velvety and rich. Late and tall. Much admired in our nursery. Good with Aster Lil Fardell.
- Baron van Heeckeren. Rich salmon-pink with large spikes.
- Caroline Vandenberg. Nearest to blue of any variety we have yet found. 35 cts. each.
- **Debs.** Brilliant red. Very striking color. Growth somewhat spreading.
- **Dr. Konigshofer.** Brightest orange-scarlet. Very brilliant. Good grower, though not so vigorous as the pink and white varieties. 30 cts. each.
- Enchantress. Called an improved Elizabeth Campbell, slightly deeper in color and more vigorous in growth.
- Europa. White, with crimson eye.
- Fernand Cortez. Deep pink, almost red in effect. Brilliant in mass. Good grower.
- Flora J. Riedy. New white variety with large flowers and good habit. 30 cts. each.
- George Stipp. Brilliant carmine. New variety. 35 cts. each.
- Hans Volmuller. This is one of several lavender varieties that are quite similar.
- Le Mahdi. This is blue-purple in cloudy weather and in morning or evening light, but in bright sunlight it is red-purple. We recommend planting it in light shade.

- Maid Marian. Good lavender variety, very similar to the older Antonin Mercie.
- Miss Lingard. White, with faint lilac eye. The earliest of the tall Phlox. Blooms over a long period. One of the best varieties for landscape. Plant with Delphinium.
- Miss Verboom. This is the lavender-pink form of Miss Lingard and blooms as early.
- Mrs. Jenkins. White. The next white to bloom after Miss Lingard.
- Mrs. Milly Van Hoboken. Very large flowers of pale mauve-pink.
- Mrs. Scholten. Brilliant, deep red. Large florets and spikes. 40 cts. each.
- Painted Lady. Silvery pink with dark eye, similar to Ruth May but earlier. 30 cts.
- Professor Virchow. Bright carmine, tinged orange-scarlet.
- Rheinlander. Salmon-pink, darker than Enchantress. Early. Large flower and one of the best varieties.
- Riverton Jewel. Rose-pink with red eye. Very large trusses. Rather late.
- Rosenkavalier. Rich carmine pink, with large flowers. 30 cts. each.
- Ruth May. Very pale pink with dark eye. New variety, introduced by us, blooming very late and freely. Very large trusses. 35 cts. each.
- Widar. Red-violet with large white center. Effective in mass. Use with Liatris.

- PHYSOSTEGIA grandiflora, Vivid. 1½ ft. August, September. New, dwarf, lateblooming variety with deep pink flowers.
- PLATYCODON grandiflorum. Balloonflower. 1½ to 2 ft. July, August. Large, blue, cupped, star-shaped flowers, allied to the Campanulas.
- POLEMONIUM caeruleum. Greek Valerian. 1½ ft. June. The tallest variety, with blue flowers showing golden anthers. Sold also under the name Polemonium Richardsoni.
  - humile. 6 in. May, June. Pale blue flowers and fern-like foliage. This is the scarce dwarf variety desirable for rock gardens.
  - reptans. Jacob's Ladder. 1 ft. May, June. Showy blue flowers on a bushy plant.
- **POLYGONATUM multiflorum.** European Solomonseal. 3 ft. May. Flowers similar to native variety but earlier. No fruit, but better foliage. Grows into thicker clumps.
- PRIMULA denticulata cashmeriana. Kashmir Primrose. 1 ft. April. Globular blossoms, white to lavender, on tall stems rising from low tufts of foliage.
  - polyanthus, Munstead Giants. Polyanthus Primrose. 9 in. May. Vigorous strain in shades of yellow and white. 30 cts. each, \$2.50 for 10.
  - polyanthus, Mixed. Shades of red, yellow, and white. 30 cts. each, \$2.50 for 10.
- **PYRETHRUM roseum.** Painted Lady. 2 ft. June. Daisy-like flowers in shades from pink to red on long stems. Single. Mixed colors.
- **SALVIA azurea grandiflora.** Great Azure Sage. 3 to 4 ft. August, September. Sky-blue flowers on long spikes.
  - pitcheri. 3 to 4 ft. September. Blooms just after azurea and flowers are darker blue.
- **SAPONARIA ocymoides.** Rock Soapwort. 8 in. June. Creeping plant with rose-pink flowers.
- SAXIFRAGA crassifolia. Leather Saxifrage. 15 in. May. Large leathery leaves and pink flowers. Useful in rocks and walls. Will thrive in part shade. 30 cts. each, \$2.50 for 10.
  - MacNabiana. 1 ft. May, June. A rock plant with a rosette of leaves and clusters of white flowers. 20 cts. each, \$1.50 for 10.
- **SEDUM acre.** Goldmoss. 4 in. June. Bright yellow. Green foliage. Creeping habit. 20 cts. each, \$1.50 for 10.
  - **album.** White Stonecrop. 5 in. June. White flowers. Creeping habit. 20 cts. each.
  - —murale. A variety of album with pinkish flowers and darker foliage. 20 cts. each.
  - altissimum. 7 in. July. Cream-white flowers. Blue foliage.
  - anacampseros. Shy Stonecrop. 6 in. July. Similar to pruinatum forsterianum.
  - ewersi. Ewers Stonecrop. 6 in. September. Purple-pink flowers. Gray foliage.
  - kamtschaticum. Orange Stonecrop. 7 in. July. Bright pulpy foliage. Yellow flowers in flat clusters. 20 cts. each, \$1.50 for 10.

- lydium. Lydian Stonecrop. 5 in. Pinkish flowers. Green foliage turning red in fall. Spreading habit.
- **pruinatum forsterianum.** Similar to anacampseros.
- Yellow flowers. Bright green foliage. Creeping habit. 20 cts. each, \$1.50 for 10.
- sexangulare. Hexagon Stonecrop. 5 in. July. Starry yellow flowers similar to S. acre. 20 cts. each, \$1.50 for 10.
- sieboldi. Siebold Stonecrop. 6 in. August, September. Bright pink flowers. Gray foliage. Not so hardy as some.
- spectabile. Showy Stonecrop. 1½ ft. September. Light pink flowers. Thick, glaucous leaves.
- -, Brilliant. 1½ ft. September. Like the above, but with deeper amaranth flowers.
- spurium. Running Stonecrop. 6 in. July, August. Pinkish flowers Flat succulent leaves. Trailing habit. 20 cts. each.
- spurium coccineum. Scarlet Running Stonecrop. Like the above, but rosy crimson flowers and reddish stems. 20 cts. each.
- sempervivum. Houseleek; Hen and Chickens. 6 in. Fleshy leaves in rosettes. Several varieties have interesting pink star-shaped blossoms. Will grow in dry, hot place. Essential for the sunny rock garden. The names of Sempervivums are much confused; we have distinct varieties under the following names differing in the size, color, and shape of the rosettes. Single rosette, 15 cts. each, \$1.20 for 10 (of the same variety). Small clumps, 25 cts. each, \$2 for 10.

#### alberti.

**arachnoideum.** Spiderweb Houseleek. Leaves in tight rosettes connected by cobweb-like threads.

fimbriatum.

funckii.

**globiferum.** Tightly incurved, light green. **pittoni.** 

potsi. Very small rosettes.

- SILENE alpestris. Alpine Catchfly. 6 in. June. Dwarf rock plant with white flowers.
  - maritima. Sea Campion. 5 in. Trailing bluegray foliage, carnation-like white flowers.
- THALICTRUM aquilegifolium purpureum Purple Columbine Meadowrue. 3 ft. June. Feathery rosy purple flowers.
  - glaucum. Dusty Meadowrue. 3 to 4 ft. July. Feathery pale yellow flowers. Finely cut foliage. Very effective.
- THERMOPSIS caroliniana. 3 to 4 ft. June, July. Yellow pea-shaped blossoms on tall stems. Combines well with Delphinium.
- THYMUS serpyllum album. White Thyme. 4 in. June, July. Mats of bright green foliage and clouds of white flowers.
  - —argenteus. Silver Thyme. 4 in. June, July. Mats of green foliage streaked with white. Fragrant. 30 cts. each, \$2.50 for 10.

#### THYMUS serpyllum, continued

- —coccincus. Crimson Thyme. 4 in. June, July. Mats of dark green foliage and clouds of crimson flowers.
- —lanuginosus. Woolly Thyme. 4 in. Mats of soft gray foliage. Few flowers but delightful foliage effect.
- TRILLIUMgrandiflorum. Snow Trillium. 1 ft. May. Large white flowers. Should be planted in masses, in part shade, in fall. Dormant roots, collected in the fall, 85 cts. for 10, \$6.50 per 100. Larger roots, nursery grown, 20 cts. ea., \$1.50 for 10, \$12 per 100.
- TROLLIUS europaeus. Globeflower. 1½ ft. May, June. Yellow flowers like large, double buttercups. Grow in part shade. 35 cts. each, \$3 for 10.
  - ledebouri, Golden Queen. 1½ ft. June. Like the preceding but color rich orange-yellow. This is a new variety from England, said to be very large, vigorous, and free-blooming. 50 cts. each, \$4 for 10.
- TUNICA saxifraga. Saxifrage Tunicflower. 6 in. Slender foliage and profusion of tiny starry pink flowers through summer.
  - —flore-pleno. New, and scarce, form with deeper pink, double flowers. One of the most delicate and charming plants for the rock garden. 50 cts. each.
- VALERIANA officinalis. Garden Heliotrope. 4 ft. June. Showy heads of rosy white flowers with delicious heliotrope odor.
- VERONICA incana. Woolly Speedwell. 1 ft. July, August. Deep blue flowers in pointed spike and handsome silvery foliage.
  - longifolia, Blue Ridge. 3 ft. August, September. Slender pointed spikes of blue varying in shade. Similar to Spicata.
  - —subsessilis. Clump Speedwell. 2 to 3 ft. July, August. Large deep blue flowers and one of the best blue perennials. Use with white Phlox. 30 cts. each, \$2.50 for 10.

- plant with gray woolly foliage and pink flowers. Needs dry place between rocks.
- repens. Creeping Speedwell. May. Small pale blue flowers. Grows flat on ground. Best used in rock garden.
- teucrium prostrata. 3 in. May. Dwarfer and more compact than rupestris and blooms a little earlier.
- —, Royal Blue. 9 in. June. Taller than rupestris and blooms later.
- -rupestris. Rock Speedwell. 4 in. May, June. Spreading mat of deep green foliage with cloud of blue flowers.
- —rupestris nana compacta. 4 in. May, June. A compact and slower-growing form with dark handsome foliage. Rare. 30 cts. each, \$2.50 for 10.
- -rupestris rosea. Pink Rock Speedwell.
  4 in. Like rupestris but with pink flowers.
- VIOLA cornuta, Jersey Gem. 6 in. New variety of compact habit with large, deep violet flowers on long stems. Blooms all season. Very fine. Effective with yellow Narcissus.
  - odorata, Rosina. 5 in. New variety with small, deep pink, very fragrant flowers. Likes half shade.
  - Pedata. Birdsfoot Violet. 5 in. May, June. Native variety with divided leaves. Grows in sandy soil in sun. Needs sour soil. Flowers lavender, orange center. 20 cts. each.
  - pedata bicolor. This rarer form has the two upper petals deep velvety purple.
  - priceana. 5 in. May. Handsome white violet with showy blue center. Not fragrant. 20 cts. each, \$1.50 for 10.
  - septentrionalis. 5 in. May. White flower with faint marking in throat. Good for shade. Not fragrant. 20 cts. each.
- YUCCA filamentosa. 4 to 5 ft. July. Tall spike of large, drooping cream-white flowers. Long, narrow sword-like foliage 2 feet high. Used effectively with shrubs.

### HARDY FERNS

In half-shady locations where few flowering plants will succeed hardy ferns will often solve the planting problem. Their graceful beauty and variety of foliage, and extreme hardiness and permanence make them a valuable addition to gardens. Leaf mold or peat moss is essential to most varieties.

All varieties are 20 cts. each, \$1.50 for 10.

- ADIANTUM pedatum. American Maidenhair. 1½ ft. This most graceful fern is lovely for a half-shady wild garden or rock garden, where the soil is good and not too dry. It associates well with Azalea, Laurel, Mertensia, and white Viola.
- ASPLENIUM platyneuron. Ebony Spleenwort. 1 ft. A dainty gem for the small shady rock garden. Use it with Aquilegia canadensis, Campanula rotundifolia, Phlox divaricata, and Primulas.
- OSMUNDA claytoniana. Interrupted Fern. 3
  ft. A large fern, easy to grow, useful for foundation planting.
  - foundation planting.

    regalis. Royal Fern. 3 ft. A handsome large fern for part shade, in acid soil not too dry.
- PTERETIS nodulosa. Ostrich Fern. 3 ft. Another tall handsome fern for part shade.
- WOODSIA ilvensis. Rusty Woodsia. 6 in. This little fern is ideal for sunny rock gardens with the Sedums, creeping Phlox, and Viola pedata.

### ROCK PLANTS

ROCK GARDENS harmonize with our New England landscape with its outcropping ledges and rambling stone walls. They require little space and a secluded corner is available in almost every yard. They form a setting for many of our frail native plants and small herbaceous plants of creeping habit not suited to the perennial border. The green of dwarf evergreens, the varied tones of plant foliage, and the colors of flowers are delightful with the gray surfaces of stones. The choice of rocks, and the placing of them with regard to conserving moisture and forming pockets for plant roots, and with care for natural effect, is an art requiring thought and patience. Help can be gained by observation of rocks in natural scenery, and by consulting books on rock gardens.

The following plants are suitable for small rock gardens. Descriptions and prices are given in the other sections of the catalogue. Many of the smaller varieties of bulbs, like Muscari and Scilla, which we offer in the fall, are charming additions.

### **EVERGREENS AND SHRUBS**

Arctostaphylos uva-ursi. Berberis thunbergi minor. Calluna vulgaris nana. Chamaecyparis obtusa nana. Daphne cneorum. mezereum. Erica carnea. Euonymus radicans minimus. Juniperus sabina tamariscifolia. Leiophyllum buxifolium prostratum. Pachistima canbyi. Picea canadensis albertiana conica. excelsa maxwelli. excelsa pygmaea. Taxus cuspidata nana. Thuja occidentalis, Little Gem.

#### HERBACEOUS PLANTS

Ajuga genevensis. Alyssum (All varieties on page 3). Androsace sarmentosa. Anemone pulsatilla. Aquilegia alpina. canadensis. flabellata. **Arabis** (All varieties on page 3). Arenaria verna caespitosa. Artemesia frigida. Aubrietia deltoidea. Campanula carpatica. carpatica alba. garganica. rotundifolia. Cerastium tomentosum.

Dianthus caesius hybrid. deltoides. Dicentra formosa. Epimedium (All varieties on page 5). Gypsophila repens. Heuchera sanguinea. Iberis sempervirens, Little Gem. Iris (dwarf) (All varieties on page 8). Lavandula officinalis, Munstead Variety. Lotus corniculatus. Lychnis alpina. Nepeta mussini. Papaver alpinum. Phlox (dwarf) (All varieties on page 11). Polemonium humile. **Primula** (All varieties on page 13). Saponaria ocymoides. Saxifraga crassifolia. MacNabiana. Sedum (All varieties on page 13). Sempervivum (All varieties on page 13). Silenc alpestris. maritima. Thymus (All varieties on page 14). Tunica saxifraga. saxifraga flore-pleno Veronica pectinata rosea. teucrium (All varieties on page 14). Viola cornuta, Jersey Gem. odorata, Rosina. pedata. pedata bicolor.

### **FERNS**

Asplenium platyncuron. Woodsia ilvensis.

### EVERGREENS

E appreciate the value of evergreens for contrast with deciduous shrubs, for accents and background in the perennial garden, and for cheerful decorative effect in winter. The dwarf and slow-growing varieties are especially useful in small yards and gardens, and for foundation plantings. Evergreens should be planted in April and May, if possible. While we do not recommend late fall planting for small evergreens, it is sometimes possible to plant successfully in late August and early September. Most evergreens like full sun, though reflected heat close to the south side of a house is too hot. They do fairly well on the east and west sides, with half shade.

Evergreens are dug with a ball of dirt and tied in burlap. The price given is for a single plant. For the rare and choice varieties, of which we have but few plants, the single rate prevails. For other varieties, if five or more plants of the same

variety and size are bought, the price is 8% less.

### FLOWERING SHRUBS AND TREES

O home planting is complete without some flowering shrubs and a few of the smaller flowering trees. We offer a list of the best varieties, especially those suitable for smaller yards and gardens and for planting as backgrounds for perennial borders. Most of these varieties can be planted either in spring or fall, a few of the less vigorous succeeding better if planted in spring.

| ACER palmatum atropurpureum. Blood-                      | viscosa. Swamp Azalea. Very fragrant white  |

#### INFORMAL GARDENS AND NATIVE PLANTS

The small city garden is usually planned on formal lines as the most logical and economical arrangement of the small lot. But if the lot is larger, the shape irregular, or the grade uneven, there is an opportunity for developing an informal planting in which native plants can be used effectively. We have made several informal gardens and are enthusiastic over this type where it is appropriate to the site. Informal gardens have several advantages. They are more distinctive and varied in design and less monotonous than formal gardens. They are less expensive to construct and to maintain. The plant material used in them is hardier and more permanent. They are more successful in partly shaded areas. And though perhaps less colorful, their effect is more restful and refreshing.

Many of our native trees, shrubs, perennials and ferns are adapted to informal gardens and with the addition of a few large rocks and simple rustic furniture delightful natural arrangements can be made. Some of the following choice native plants can be used for this purpose,—Juniperus virginiana, Thuya occidentalis, Tsuga canadensis, Kalmia, Pieris, Rhododendron carolinianum, Taxus canadensis, Azalea, Clethra, Cornus florida, Vaccinium, Aquilegia canadensis, Campanula rotundifolia, Cimicifuga, Lilium canadense, Mertensia, Trillium, Viola, and Adiantum pedatum.

We plan and plant all types of gardens.

### ROSES

N choosing varieties of Roses the beginner should be advised that the Hybrid Roses, though more beautiful in form and color and blooming over a Llonger period, are not quite so hardy as the other Roses in the list and require

more careful planting, cultivation, and protection.

Most Hybrid Roses are budded and should be planted deep enough so that the point of union is 1 inch below the surface of the ground. When planted they should have soil mounded up around them 6 inches high until they start, to prevent the canes from drying. After settled cold weather (about Thanksgiving) Roses should be protected by hilling dirt up 10 inches high around the plant and then covering with leaves, straw, manure, or evergreen boughs.

### HYBRID ROSES

Strong 2 yr. plants, 60 cts. each, \$5.50 for 10, except those priced differently.

Betty Uprichard. Carmine and salmon.

Charles P. Kilham. Brilliant oriental red flushed orange. 75 cts.

Frau Karl Druschki. White, very large and free-blooming.

Golden Dawn. New clear yellow variety. Fine new variety. 75 cts.

Gruss an Teplitz. Velvety crimson-scarlet.

Very hardy and free-blooming.

Miss Cynthia Forde. Deep rich pink. Mme. Jules Bouche. Blush-white.

Mrs. Charles Bell. Shell-pink, shaded salmon.

Mrs. Erskine Pembroke Thom. Yellow.

Mrs. Henry Morse. Light pink.

Olympiad. Dark oriental scarlet with golden base. 75 cts.

President Hoover. Dazzling combination of pink, flame, scarlet, and yellow. 75 cts.

Radiance. Brilliant pink. Red Radiance. Cerise-red.

Schwabenland. New rich rose pink variety,

very large. 75 cts.

Talisman. Yellow and copper. New and unusual color combination.

Vaterland. A new rich dark velvety scarlet-75 cts. maroon.

### **CLIMBING ROSES**

Strong 2 yr. plants, 50 cts. each, \$4.50 for 10 3 yr., 75 cts. each, except those priced differently

American Pillar. Single; deep pink with white

Chaplin's Pink Climber. Rich pink. New variety of great promise.

Climbing American Beauty. Deep pink, and earlier than other climbers.

Dr. W. Van Fleet. Flesh-pink.

Jacotte. Salmon-orange. A very beautiful and hardy climber, though somewhat slow at first. 2 yr., 75 cts.; 3 yr., \$1. Mary Wallace. Semi-double; rose-pink.

Mme. Gregoire Staechelin. New variety with very fragrant pink flowers. 2 yrs., 75 cts. Paul's Scarlet Climber. Clear scarlet, very brilliant. The best red climber.

Primrose. New yellow rambler.

The New Dawn. The new everblooming form of Dr. Van Fleet. Flesh-pink. 2 yr., \$1.50 each.

#### BABY RAMBLER ROSES

Strong 2 yr. plants, 50 cts. each, \$4.50 for 10 Echo. Light pink. Orleans. Brilliant light red, white center.

### VARIOUS ROSES

F. J. Grootendorst. Hybrid Rugosa. Shrubby plant with Rugosa foliage and crimson blossoms in clusters throughout the season. Good for hedges. 50 cts. each, \$4.50 for 10. Pink Grootendorst. New form with clear pink

50 cts. each, \$4.50 for 10.

Harison's Yellow. Shrubby Rose with semi-double yellow flowers. Handsome and hardy.

3 yr., 85 cts. each, \$7.50 for 10.

Hugonis. Shrubby Rose with large, single, light yellow flowers in profusion all along the graceful arching branches. This is the earliest Rose to bloom, coming soon after Memorial Day. A mature plant in bloom, 8 ft. high and almost as wide, makes a very striking display. 2 yr., 60 cts. each, \$5.50 for 10; 4 yr., \$1 each.

### FERTILIZERS

PLANTS of all kinds need food. Too many gardens fail to prod results because they are not sufficiently or properly fertilized. must liberal quantities of fertilizer be mixed deep with the soil when garden is planted, but it must be applied afterward as a top dressing seven times through each season. We use the following fertilizers in our nursery as no recommend them for home gardens. We can advise what kind and what amount of fertilizer to use if we know the extent of the garden, the kind of plants, and the character of the soil, to which it is to be applied.

### VICTORY FERTILIZER

This fertilizer is made of Humus with concentrated chemical elements added in the proportion of 4-8-4, viz: Ammonia 4 per cent, Phosphoric Acid 8 per cent, Potash 4 per cent. It has all the value of a first-class fertilizer (which is usually made with sand as a "base") plus the added advantage of the Humus which makes up its bulk, thus making it all available plant food. A general all-round fertilizer for flowers, vegetables, and lawn. Clean and practically odorless.

Less than 25 lbs. at 6 cts. per lb. 25 lbs.....\$1.25 100 lbs.....\$ 3.25 50 lbs..... 2.00 ½ ton..... 15.00

### MARKET GARDEN FERTILIZER

This 5-8-7 complete well-balanced fertilizer is used by market gardeners, but is also valuable in the flower garden. Though it contains no valuable base material as in Victory Fertilizer, it has the three principal plant food elements in inexpensive form.

Less than 25 lbs. at 4 cts. per lb. 5 lbs.....\$ .75 100 lbs.....\$2.15 25 lbs.....\$ .75 50 lbs..... 1.25 1/4 ton.... 9.75

#### **HUMUS**

Humus is a natural product, not a chemical fertilizer. It is peat dug from deep bogs, finely ground and dried. It contains very little Nitrogen and Potash but is especially valuable for the organic matter, and for its capacity to hold moisture, making it excellent for use on light soils. Rhododendrons, Kalmias, Azaleas, Blueberries, and Lilies like a peaty soil.

Less than 25 lbs. at 4 cts. per lb. 25 lbs. . . . \$ .75 50 lbs. . . . 1 .00 100 lbs. . . . 1 .60 14 ton....\$ 6.50 12 ton..... 11.00 1 ton..... 20.00

### BONE-MEAL

This is a valuable, though not a complete fertilizer. It contains a large amount (23%) of Phosphoric Acid and should be supplemented with Nitrogen and Potash. It is excellent especially for the few plants, like Iris, which do not need much manure, also for bulbs in the fall.

Less than 25 lbs. at 5 cts. per lb. 25 lbs.....\$1.00 100 lbs.....\$ 2.60 50 lbs..... 1.50  $\frac{1}{4}$  ton..... 12.00

### COTTONSEED MEAL

The plant foods in this material analyze about 6-2-2. Being rich in nitrogen it makes an excellent, inexpensive fertilizer for lawns. Combined with bone-meal it is good for general garden pur-100 lbs.....\$2.50 ½ ton.....\$11.50

#### **MENDERTH**

This is not a fertilizer in the usual meaning. It is a soil builder made of a special kind of finely ground rock containing mineral elements valuable to plants. Some users find it discouraging to pests and diseases. Should be supplemented by humus in some form. Valuable for worn out 100 lbs.....\$2.50  $\frac{1}{4}$  ton.....\$8.75

### GROUND LIMESTONE

Lime is used to correct acid soil, to transform plant-foods in the soil so that they will be available to plants, and to improve the physical condition of the soil. Certain plants such as bearded Iris and many rock plants are especially benefited by lime. It should not be applied near Rhododendrons and other plants of the Heath family which need acid soil 50 lbs.....\$.55 100 lbs.....\$.90

### PEAT MOSS

A dried, partly decayed, fibrous moss imported from Germany. This contains little or no plant food and is not used as a fertilizer but to improve the physical condition of soils. It benefits light dry soil by absorbing and holding moisture; and it improves heavy soil by breaking up the stiff particles, aerating it, and making it suitable for root penetration. Being slightly acid in reaction it is the ideal mulch for ericaceous plants and Lilies. If used around other plants the slight acidity can be corrected by occasional use of lime. The neat appearance of Peat Moss on the ground makes it very desirable for mulching Rose beds. Largest size bale, (about 150 lbs.) \$2.90; 5 bales, \$13; 10 bales, \$24; half bale, \$1.75.
